DESIGN DETAILS

DESIGN NAME:
Mobile App "Yozhka"

PRIMARY FUNCTION:
Game

INSPIRATION:
I designed mobile web interactive game which can be used by parents, teachers, docotors to educate children how to keep out of danger.

UNIQUE PROPERTIES / PROJECT DESCRIPTION:
The application works in the form of interactive games. Within the games the child shows a picture describing a situation of risk , and the question - what hero should do. Different situations are presented. Choosing one or the other option, the game participant receives an explanation of the word " pop-up " friendly character with the words he chose the right option or not and an explanation of why. According to the results of the game child gets rewarded with certificate or not.

CHALLENGE:
We begin to specify the script and storyboard. When it was ready we have to think about visuals and how they work in every scene. It was hard to explain the emotions of characters because there are a lot of nuances.

This design was made for a client of ours.

NAME:
Family2Children

PROFILE:
We sincerely believe that every child should grow up in the atmosphere of love, care, understanding and respect. We work so that children never know the sorrows of orphanage, violence and injustice. Together with our supporters and state organizations we implement social projects on prevention of early abandonment, abuse in children's homes and families and we also train specialists on effective social techniques.
